

Marck Biosciences to enter Singapore, Malaysian markets

Our Bureau
AHMEDABAD

MARCK Biosciences, a manufacturer and marketer of sterile dosages pharma products and Blow-Fill-Seal specialist, on Thursday announced its plan to enter the Singapore and Malaysian market. Marck said that its manufacturing facility had received an approval from the NPCB (National Pharmaceutical Control Bureau), Malaysian health ministry for large volume parenteral, small volume parenteral and ophthalmic.

Marck, which has presence in about 70 countries across the world, plans to

introduce a range of small volume parenterals including ophthalmic, irrigation solutions, injectibles and respiratory solutions, and IV parenterals formulations in the large volume parenterals in Singapore and Malaysia.

Commenting on the development Marck Biosciences MD Bhavesh Patel said, "The NPCB approval has significant implications for Marck. First, our early entry into Malaysia and Singapore opens up a large export market for our products. Second, the manufacturers of these countries can now get their brands outsourced from Marck. Third, since NPCB is a participant of the Pharmaceutical Inspection

EXPANSION PLANS

Marck, which has presence in about 70 countries, plans to introduce a range of small volume parenterals including ophthalmic, irrigation solutions, injectibles and respiratory solutions in Singapore and Malaysia

Convention and Pharmaceutical Inspection Co-operation Scheme (PIC/S), which has 36 participating authorities including those from UK and Australia, the approval

will help our registrations endeavor in other PIC/S member countries."

The South-East Asian countries represent a total market of 588 million people

and a combined GDP of \$2.2 billion. Marck Biosciences provides product development solutions and manufactures a range of dosages for top pharma marketers in India and world and its products are marketed in countries across Latin America, Asia, Africa, Asia and Pacific Ocean countries.

Among India's leading manufacturer of parenterals with Blow-Fill-Seal technology, worldwide accepted as the most advanced technology for manufacturing sterile liquid, Marck manufactures and markets the widest range of sterile dosages spanning fluid therapy, ophthalmic, respiratory, irrigation solutions and anti-infective across India.
