

# Marck to enter Latin American market

## Bureau

Ahmedabad, Mar 11

Marck Biosciences Ltd, manufacturer of sterile liquid parentals and a blow fill seal specialist, has announced its plans of entering the Latin American market.

According to a company release, Marck has received Anvisa approval for exporting sterile injectibles to Brazil. The company will roll out its Latin American foray beginning with Brazil. Argentina, Chile, Columbia, Mexico and Peru are the other countries in the region which the company is targeting. This foray is aimed at spearheading their plan to cross the target turnover of Rs 100 crore in 2008-09.

Marck has one of the largest installations of its kind in Asia, with equally sizeable capacity in the LVP space.
